

FXP 30

WALLENSTEIN

FORESTRY

FXP

SKIDDING PLATE

3-POINT HITCH

STEP UP TO THE PLATE

Simple and effective, the FXP Skidding Plate is in a league of it's own, saving your logs and trails from unnecessary damage. The FXP Skidding Plate raises the log's front end, preventing it from carving a trench as you drive.

Make a line drive without the line, contact your Wallenstein dealer about the FXP Skidding Plate.

WALLENSTEIN FXP SKIDDING PLATE

Standard Equipment

Removable Hitch

Four Chain Holder Slots

Optional Equipment

Choker Chains

Log Tongs

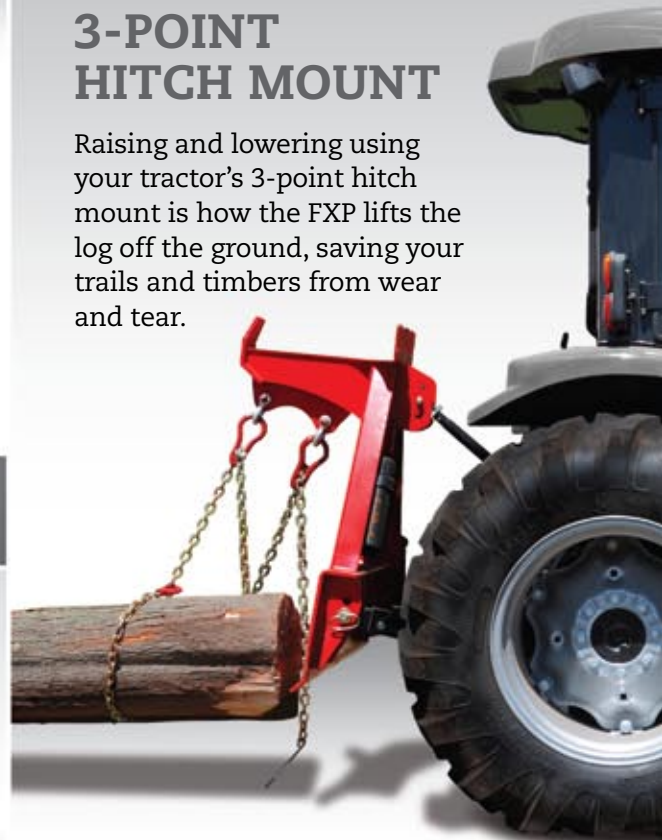

SKID' ER DONE

Capable of handling multiple logs at one time, the FXP reduces the drag surface by lifting the front end of the logs. This gives you better control when turning, as the log acts like a trailer. The optional Choker Chains and Log Tongs are both ideal tools for quick hookup.

3-POINT HITCH MOUNT

Raising and lowering using your tractor's 3-point hitch mount is how the FXP lifts the log off the ground, saving your trails and timbers from wear and tear.
